Wealthtech Weekly

April 17, 2025

By Rob Burgess
Reporter

Fueled by the rise of AI and known names like Apple, Microsoft, Meta and others, many technology ETFs have experienced phenomenal growth. However, the current tariff turmoil could shift global trade patterns, pushing international companies to diversify beyond the U.S.

This week, I took a look at the 10 best- and worst-performing technology ETFs of the past three years.

How do you think about technology ETFs in portfolios? Let me know — robert.burgess@arizent.com.

I hope you'll check out the article, along with the rest of this week's stories.

As always, thank you for reading. Talk to you next Thursday!

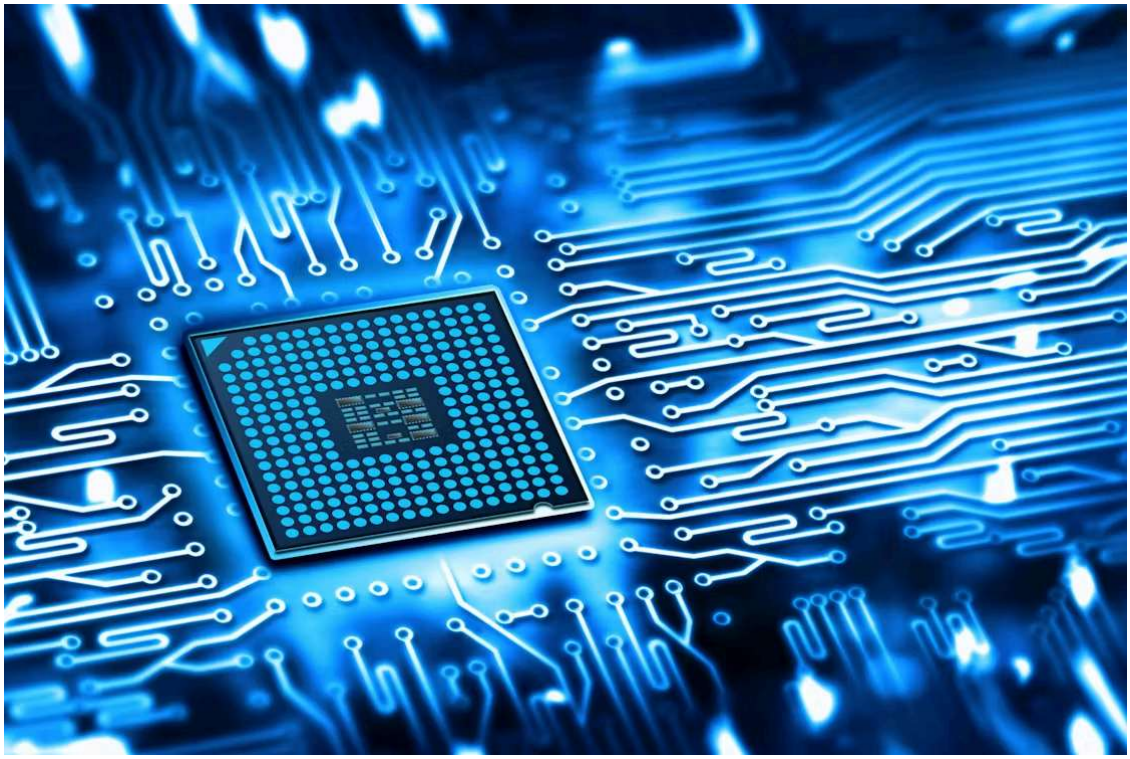
The 10 best- and worst-performing technology ETFs of the past 3 years



Fueled by the rise of artificial intelligence and its associated infrastructure, many technology ETFs have experienced phenomenal growth.

- **Advisors' overall confidence sinks to new lows as volatility reigns**
  Unpredictable policy outcomes and market volatility have led this month's Financial Advisor Confidence Outlook deep into the red.

- **How advisors' daily routines do and don't change during crises**
  Advisors who have developed a consistent rhythm say preparing ahead of time for periods of volatility can reduce stress in the moment.
- **Interest in faith-based investing is high, but awareness is low**
  A recent Praxis Investment Management study found nearly half of surveyed investors were interested in factoring their faith into their investment decisions.
- **How advisors can use ABLE accounts for disabled clients**
  These tax-advantaged savings accounts will be open next year to a much wider range of disabled clients.
